

IN THE ABSTRACT:

Please amend the abstract as follows:

--When ~~an A~~ a service N provided by ~~an A~~ a service provider M is accompanied by the use of an accounting service provided by an accounting service provider, ~~an A~~ a service proxy object n and accounting service proxy object m are acquired. Client information is set in the acquired accounting service proxy object, and the accounting service proxy object holds it. The client information is transferred to the [[A]] service provider N via the [[A]] service proxy object n. The [[A]] service provider N uses the service of the accounting service provider by using the accounting service proxy object which holds the user information.--
